

management reporting

As a business, you are responsible for the waste you produce. You need to report facts and figures that will help you understand how you generate waste materials and how you achieve its effective and responsible management. Our reporting systems will keep you on track.

LEGAL COMPLIANCE

As a producer of controlled waste, you have a duty of care under Section 34 of the Environmental Protection Act 1990. You are required to prepare a transfer note that properly describes the material that you generate and ensure that it is passed onto an authorised waste carrier such as us. We will ensure that you are fully compliant with this legislation and will provide you with appropriate documentation to meet your requirements in order to complete the audit trail.

WASTE VOLUMES AND COST TRANSPARENCIES

Our reporting systems will allow you to understand how much waste you produce and how much of that is recycled, reused or recovered. We will also provide cost breakdowns by type of waste if you require.

ONLINE PORTAL

Some of our larger customers wish to have direct access to their own waste data. We have provided a bespoke web-portal to enable them to interrogate their data in order to produce their own corporate reports. We are always happy to discuss with customers their own direct data access requirements.

ELECTRONIC INVOICING AND PAPERLESS WASTE TRANSFER

We have now introduced a paperless ticket system so that when our drivers come to your site, your staff only need to sign our hand-held device. Your waste transfer note and invoice will be sent direct to your head office (or wherever else you specify) so that you no longer need to track your waste with paper. This saves everyone time, money and effort and is good for the environment.

management reporting

OUR INTERNAL REPORTING SYSTEMS

As holders of ISO 9001, ISO 14001 and OHSAS 18001, we are required to monitor and report our own performance and to regularly review our performance objectives. Some of our customers find this information useful because we form part of their supply chain. We can therefore provide you with information on our performance in a number of areas such as:

- Environment Agency and other regulatory compliance
- Health & Safety and reportable accidents
- Performance against our good driving charter
- Our extensive charitable and community initiatives
- Fuel, electricity and water consumption
- Energy production
- The amount of waste we recycle and treat
- Customer compliments and complaints
- Environmental performance
- Staff development
- Awards and achievements
- Carbon footprint

OUR CLIENTS

- Blue chip
- Construction
- SME
- M.O.D
- NHS
- Council
- Municipal
- Civil Service
