

Hills total waste management

We are one of the largest family-owned waste companies in the UK offering you practical and sustainable options for managing your waste.

OUR APPROACH

- **Working with you:** we will work closely with you to find solutions that meet the needs of your business
- **Passing on savings:** we can typically help you achieve savings of between 10% and 35% on your waste management costs
- **100% landfill diversion:** we will maximise the opportunities from our own facilities and our supply chain to ensure that none of your waste is disposed of to landfill
- **Reporting:** we can offer you a tailored reporting system and a full audit trail
- **Account management:** we can advise you if you need a bespoke solution for your site
- **Training your staff:** we can train your staff to help them accurately segregate your waste better to help you maximise the amount recovered, recycled and reused
- **Reduced vehicle miles:** our network of transfer stations enable us to reduce vehicle miles saving money and reducing your environmental impact
- **Attention to quality:** We are ISO 9001, ISO 14001 and OHSAS 18001 certified. We carefully monitor non-conformance, compliments and complaints. We take pride in resolving every issue quickly and fully
- **Customer service:** our staff are highly trained and well supported to ensure you receive the highest standards of customer service and performance
- **Reliability:** we have full business contingency plans in place ensuring you can count on us under all circumstances.

- Enclosed skips
- Ro-Ro containers
- Compactors (portable and static)
- Cage vehicles
- Hi-ab collections

TRAINING YOUR STAFF

Your staff will play a large role in recycling and avoiding waste to landfill. Reprocessors demand quality waste material inputs – which means that waste must be carefully segregated. Waste that is contaminated when collected can lead to its quality being downgraded. This means that you will either be financially penalised or your waste will end up in landfill. Either way, you lose. We take contamination seriously and we will come onto your site to train your staff on the importance of proper material segregation and the global impact of waste management.

HILLS' FACILITIES

- MBT Plant
- RDF/SRF (Refuse Derived Fuel/Solid Recovered Fuel)
- Dry recycling facilities
- Composting
- Transfer station
- HRC sites
- MRF (Material recycling facilities)
